To Whom it May Concern:

It is with great satisfaction that I write this letter of recommendation for the products that Mr. Brill's company manufactures.

Northwest Arkansas Regional Airport began using the Brill automatic toilet seat covers in December 2006. We have found these to be the ideal solution for a busy airport. They are convenient, sanitary, and provide the personal protection that our patrons are looking for. With just the wave of a hand or a push of a button, a new seat cover is activated.

We have also found that they help reduce restroom maintenance costs and cleaning time. Paper seat covers are usually pulled out in groups, wasted, end up on the floor leaving the area looking messy and unclean as well as eventually clogging the toilets, often requiring the assistance of a plumber. Paper seat covers also do not work well with handicapped toilets. With the automatic sanitary seat covers, no mess is left behind, nothing other than what is needed is used, and our customers notice and comment. They automatically spool themselves and are easily installed/replaced by maintenance personnel. We have had several posts on our various social media pages about them, so we know they have left a positive impression.

We are very satisfied with this product and are pleased to have made the switch so many years ago. Thank you for your consideration of providing this excellent product to your patrons!

Kindest regards,

Kelly L. Johnson, A.A.E.  
Airport Director
